

Mandy Zhang

Chicago, Illinois | (312) 532-3437 | mandy.zhang@yale.edu | [LinkedIn/mandyvwzhang](#)

EDUCATION

Yale University

Expected Graduation: December 2026

- BS in Computer Science
- *Relevant Coursework:* Data Structures and Programming Techniques, Mathematical Tools for Computer Science, Human-Computer Interaction, Systems Programming, Algorithms, Software Engineering, Artificial Intelligence, Machine Learning, Full Stack Web Programming, Linear Algebra, Data Exploration and Analysis, Computer System Security
- *Cumulative GPA:* 3.74/4.00

SKILLS

- **Languages:** Python, JavaScript/TypeScript, SQL, C, R, HTML/CSS, Racket, PySpark
- **ML / Data:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Roboflow, OpenCV, NLTK
- **Frameworks & Libraries:** React.js, Flask, Node.js, Express.js
- **Data & Cloud:** Databricks, Microsoft AI Foundry, Azure, Google BigQuery, MongoDB
- **Tools:** Git, SQLAlchemy, Jupyter, Tableau, VS Code

EXPERIENCE

The Options Clearing Corporation, *AI Engineer*, Chicago, IL

June 2026 – Present

- Architect and maintain a medallion (bronze/silver/gold) data pipeline to track AI adoption metrics across 1,300+ employees, transforming raw usage data into analytics ready datasets; update pipeline as Anthropic Analytics API evolves
- Build an AI-agent evaluation framework (Claude Agent SDK) to automate Tier-1 SOC alert triage, benchmarking model/effort configs for accuracy, cost, and speed

Vera Institute, *Data Scientist*, New York City, NY

October 2025 – April 2026

- Evaluated Azure OpenAI and Document Intelligence models for extracting structured data from unstructured legal documents, comparing OCR pipelines, custom extraction models, and pretrained LLM approaches.
- Implemented Azure Blob Storage ingestion pipelines to process large PDF containers and automate document extraction workflows using Python and the Azure SDK.
- Produced technical implementation guides for Azure AI infrastructure, covering model setup, storage permissions, environment variables, and SDK integration.

Develop for Good, *Product Manager – nenos Inc.*, Remote

October 2025 – March 2026

- Drafted the Product Requirements Document and tracked a project roadmap with defined milestone checkpoints, keeping a team of six engineers and designers on schedule for a 5-month website redesign
- Led weekly sprint planning sessions and facilitated recurring client meetings, using Trello to prioritize tasks and streamline workflow

Livable City Lab, *Tobin Undergraduate Research Assistant*, New Haven, CT

September 2025 – January 2026

- Fine-tuned YOLO convolutional neural network to perform object recognition on geospatial video data, supporting research on how urban environments influence human behavior.
- Engineered end-to-end Python pipelines for automated video frame extraction, pedestrian attribute classification, spatial point geo-projection via homography transforms, model training and validation, and trajectory computation, enabling scalable processing of large urban geospatial video datasets.

Steelcase, *Data Science Intern*, Grand Rapids, MI

May 2025 – August 2025

- Built a scalable K-means clustering model in PySpark and scikit-learn to segment product data on Databricks, identifying high-potential special product lines for standardization -- contributing to an estimated \$10–15M in annual cost savings.
- Processed product text with NLTK and generated embeddings using the all-MiniLM-L6-v2 sentence transformer.
- Analyzed purchasing patterns and product cannibalization trends to inform consumer behavior and product strategy.
- Defined KPIs and analytical goals with cross-functional teams (marketing, ops, engineering) to ensure technical deliverables aligned with business priorities.
- Designed and deployed interactive Tableau dashboards to drive executive-level decision-making.

Yale University, *ONEXYS Supercoach*, Remote (Seasonal)

May 2023 – August 2025

- Lead a 53-member coaching team serving 150+ incoming students, facilitating weekly strategy meetings and delivering quantitative skills instruction to improve academic performance.
